

UBIX™ at a glance

UBIX, a pioneer at the intersection of Generative AI and Reinforcement Learning, delivers the right data to the right business leader at the right time with a business-led, no-code AI platform.

Drive actionable insights and automation

Your business deserves the benefits these significant advances offered by advanced analytics and AI technologies. With UBIX, you get all the benefits of these technologies to handle the complexities and challenges facing your business without creating more challenges by trying to build this capability from the ground up. Get up and running with your own virtual private AI Cloud same day with UBIX and start solving problems now!

UBIX enables ubiquitous real-time business decisions without the need for specialized tools and resources. UBIX brings Generative AI and Reinforcement Learning in a patented, no-code SaaS

platform to contextualize and present data from inside and outside the enterprise—in minutes not days! – to dramatically increase all business metrics.

Achieving actionable insights and automation ensures individuals throughout an organization get the information they need in a human-focused format that it is actually usable. Business leaders won't have to wait on others to get information directly and in real-time. They control the formats, reports and easy modifications by themselves without compromises determined by the technical teams.

How UBIX Works

AI success is at the intersection of data access, no-code GenAI with Reinforcement Learning, and human-centric queries to understand past, present and future states.

UBIX gathers vast amounts of data from sources on-premises and in the cloud

in realtime and then standardizes that data to a common, intelligible "language" which can be seen in context with other data (high-level or in detail) as needed in order to easily see past, present, or in quickly iterated predictive models.

UBIX embraces both the autonomous

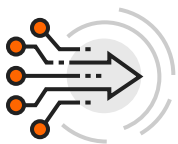

Business-Led AI Transformation Realized

Artificial Intelligence is no longer reserved for large organizations and technical teams: it's for everyone at organizations of all sizes. UBIX makes GenAI, Reinforcement Learning and Advanced Analytics available to everyone with a platform designed to ensure the right data is available to the right business leader at the right time in the right format to optimize decision making.

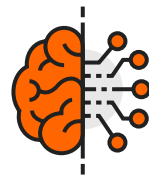

Chain of Thought Reasoning

Why wait for custom reports to be generated when you could use conversational AI to iterate your way to the optimal answer and decision? With UBIX you can enjoy user-friendly interactions, advanced search/query, and end-end AI from source connection through productionizing solutions.

Access to Data

UBIX delivers the largest and most advanced library of source system connections available across on-prem infrastructure (i.e. mainframe, ERP, SAS), cloud infrastructure (i.e. AWS, Azure, GCP), cloud applications (i.e. Salesforce, HubSpot, ServiceNow) and previous generation analytics (i.e. BI tools).

No-Code AI

UBIX is a no-code platform that cuts costs by removing the need for specialized programming skills. Our user-friendly and intuitive design makes data and processes accessible to non-technical staff, simplifying development and reducing the risk of errors, ensuring reliable results.

Human-Centric AI

UBIX leverages natural language processing (NLP) to allow business leaders to query the system with literally 0 days training. So, information is accessible to all users, regardless of technical expertise to obtain insights quickly, enhancing decision-making speed.

UBIX

Better decisions. Every metric improved

Instant, useable data for:
CFO, CMO, Supply Chain, Sales, HR, Operations, Support, Inventory/Logistics, Legal, EA

thinking and autonomous action with all the appropriate oversight that empowers the business and augments and enhances the capability of every resource in the company. UBIX harnesses automation as Intelligent Action

Agents within any use case or problem state so that the machine can embrace this capability to execute on the intended action in an efficient and scalable way leveraging task-based API's to achieve the automation.

Why UBIX?

UBIX enhances business intelligence initiatives and frees data scientists to innovate rather than serve reports. Delivering on the promise to:

- Establish business-led AI, freeing data scientists to innovate rather than serve up reports
- Get the right data to the right business leader at the right time
- Improve daily decisions that impact productivity, waste, compliance, growth, and profitability

While driving actionable insights and automation with:

- 50X faster data analytics
- 7 days time-to-value
- 0 days training required

About UBIX

UBIX, a pioneer at the intersection of Generative AI and Reinforcement Learning, delivers the right data to the right business leader at the right time, improving daily decisions that impact productivity, waste, compliance, growth, and profitability. Our patented no-code SaaS platform optimizes real-time business decisions without the need for specialized

tools and resources by contextualizing and presenting data from inside and outside the enterprise in minutes not days. We modernize AI and ML innovation for digital transformation success enabling businesspeople to directly participate in AI innovation.
