Artificial Intelligence For Everyone

UBIX | INNOVATE WILDLY

50x
Faster than Modern Data Stores

40%
Increased Forecast Accuracy

32x
Faster Speed to Insight

AI = ROI With UBIX AI Intelligent Cloud

UBIX AI provides rapid Intelligent Cloud deployment of End-End Artificial Intelligence and Advanced Analytics, removing all bottlenecks to deployments and migrations so you can focus 100% of your effort on solving problems and leveraging the power of open source all in one platform. Our users benefit from best in class AI to uncover profound business insights and deliver dynamic data-driven decision making tools. From connecting to source data to sending applications to productions and socializing across your organization, UBIX makes AI easy for Everyone.

Turnkey Intelligent Cloud
The ultimate user-friendly playground for data experimentation, modeling, and analysis - descriptive, diagnostic, predictive, and prescriptive.

Advanced Analytics Platform
The ultimate user-friendly playground for data experimentation, modeling, and analysis - descriptive, diagnostic, predictive, and prescriptive.

Pre-Built Solutions for all Departments
Get up and running surfacing insights, solving problems and driving immediate value with our massive library of data sources and pre-built analytics and data science solutions.

No-Code Application Builder
Allowing every-day business users the ability to quickly and affordably solve historical problems and innovate wildly with our easy to use application builder.

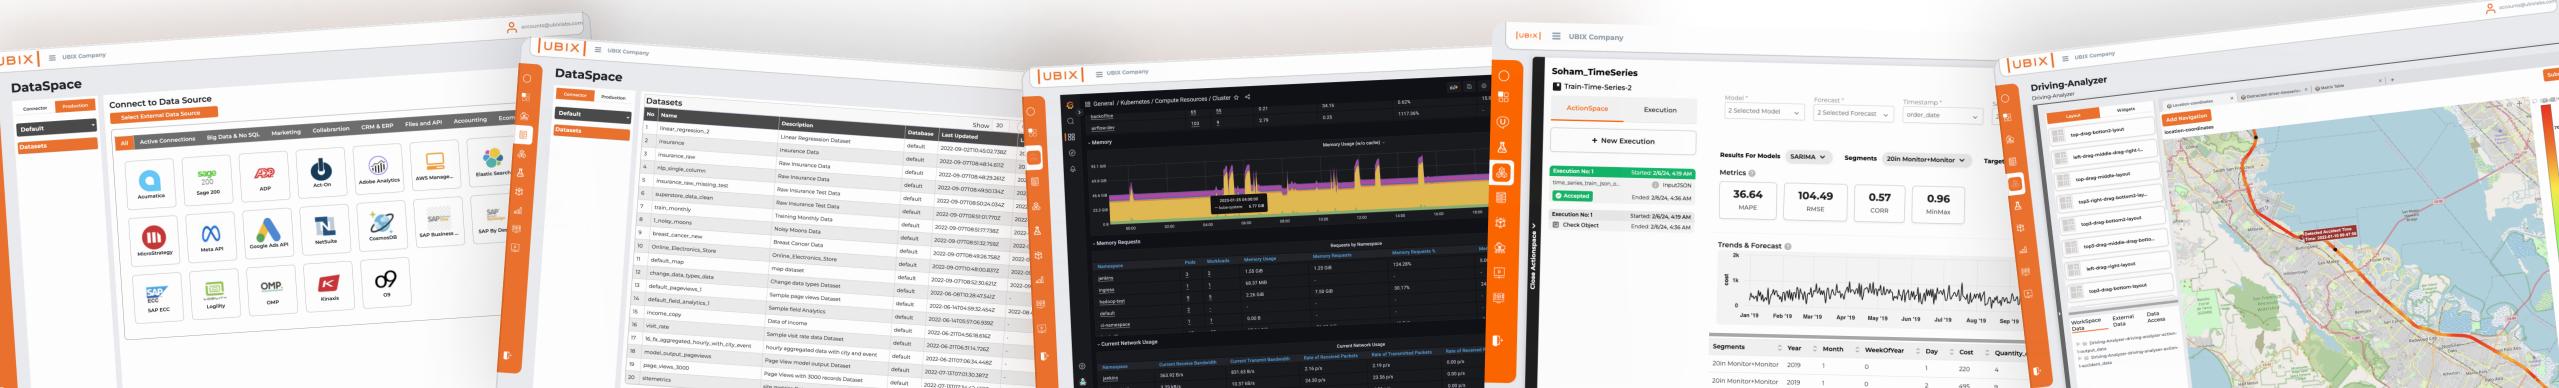

Easy Connection To All Systems
Removing silos is only a few clicks away with our massive library of existing Connectors. From ERP & CRM to Marketing, DevOps, eComm, Data Lakes, and so much more. UBIX makes it easy to make your entire stack more powerful.

Intelligent Data Mapping & Ingestion
End-End and No-Code means that UBIX makes even the mapping and ingestion of data easier. From complex migrations to simple routine tasks, ingesting wide varieties of data is as easy as drag and drop and can easily be saved to be reused for later.

Real-Time Diagnostics And Monitoring Across Systems
From monitoring sensors, network, IoT data, and more to simply monitoring internal usage, UBIX provides an unrivaled dynamic and intelligent cloud monitoring system with broad utility.

No-Code Solutions Modeling & Applications Development
Quickly surface meaningful insights and compare models before building drag and drop applications that operate without you, solving your problems over and over again, so you can move on to innovation.

Dynamic Applications, Dashboards, & API
Make Data available to Everyone with the Applications you produce. Running behind the scenes or feeding meaningful data to stakeholders, UBIX allows Data Driven Decision Making across the entire organization.
